UDDARAJU ANANDA RAJU FOUNDATION

Sri Uddaraju Ananda Raju was born in the year 1906 at Kovvada-Annavaram village, Bhimavaram Mandal, West Godavari District, Andhra Pradesh, India. He started business by establishing a rice mill in the year 1940. Being a true follower of "Bhagavad Gita", which he used to recite daily, he had an intense desire to serve the common man in various ways. His family members have established Uddaraju Ananda Raju Foundation in the year 2003 to bring his desires into reality.

ACTIVITIES OF THE FOUNDATION

Water purification plant at Kovvada-Annavaram

Healthy persons make healthy Nation

It is a well known fact that most of the villagers are deprived to potable water, as a result of which they are suffering a lot. The foundation responded to this basic need by establishing a water purification plant with a capacity of 5000 litres per hour at Kovvada-Annavaram village as its maiden activity. It is catering the needs of five villages.

Healthy villages make healthy India

The rural India is mostly dependent on Agriculture, Cattle rearing etc. Most of the villages are inaccessible to good veterinary care. To cater this need, the Foundation established "Free Veterinary Hospital" at Kovvada-Annavaram village which is providing quality veterinary medical/clinical assistance to all the adjacent villages also.

Sri Rayasani Venkatramayya, Retd. Chief Commissioner of Income tax and other eminent personalities on the release of his book "Rajaru Raju" published and distributed by the foundation.

Rich Culture make Rich Nation

India is a spiritual Nation. To bring spirituality to the doorsteps of the rural masses, the family members are conducting spiritual and cultural activities from the past 25 years. Discourses by eminent personalities, publication and free distribution of spiritual books and cultural activities by well known persons from all over the country are being arranged to strengthen the moral and spiritual base of the society.

Sri G. Vishnu Raju, Sarpanch (Koyvada-Annavaaram) and foundation members distributing the monthly ration to the old people

Old is Gold - Helping hand to the Old

The exploding population of India has pushed the age old people to a corner because of deploring economic conditions. The elderly people in villages are mostly dependent on their family members for survival, and a few of them are not getting the needed assistance. As a response to this need, the foundation is extending its helping hand to the old people by providing monthly ration, health care and most needed moral support.

Pujyasri Paripurnananda Saraswathi Swamiji delivering his speech in a spiritual programme conducted by Uddaraju Ananda Raju foundation in Bhimavaram

The members of the foundation with Sadguru Jinnuru Nannagaru at the inauguration of water purification plant

Blood is that fragile scarlet tree we carry within us.

Uddaraju Ananda Raju Foundation Blood Bank was established in the year 2009 to serve the needy of Blood. It providing around 2000 units of Blood per annum to the people in and around Bhimavaram. People suffering from Thalassemia and Hemophilia are given blood units free of cost and even charges from blood sample testing are not collected from them. Required blood units are given at a lower cost than prescribed by the Government of Andhra Pradesh.

Biofloc Technology from Theory to Practice

Dr. Yoram Avnimelech
Professor (Emeritus)

**Civil & Environmental Eng. Technion, Israel Institute
of Technology, Haifa, Israel**

Prof. Yoram Avnimelech got an M.Sc. in Soil Science-Microbiology (1960) and Ph.D. in Soil Science-Physical Chemistry (1964) from the Hebrew University. He was the Dean of the department of Agricultural Engineering and the Chief Scientist of the Israeli Ministry of Environmental Protection.

He developed novel technologies of intensive fish and shrimp systems, based on the control of the microbial system in the pond (Bio Floc Technology), heads the AES working group on biofloc technology and wrote a book on this topic. He served as a board member AES and presently is director in WAS BOD, chairing the membership and promotion committee.

***Aquaculture Environment remedies for
Disease Prevention and Control***

**Dr. Yew-Hu Chien
Professor & Dean**

**Department of Aquaculture,
National Taiwan Ocean University, Keelung, Taiwan**

Yew-Hu Chien, Ph.D., Professor in Department of Aquaculture and Dean of Office of International Affairs, National Taiwan Ocean University (NTOU), obtained his Ph.D. in Marine Sciences and M.App.Stat. in Experimental Statistics, Louisiana State University in 1980. He has been Chairman of Department of Aquaculture, NTOU; Board of Director (BD), Secretary, and Vice President of the World Aquaculture Society (WAS); BD of Asia-Pacific Chapter of WAS; Council of the Asian Fisheries Society (AFS); Secretary of Taiwan Chapter of AFS; Coordinator of Fishery Science Program of National Science Council in Taiwan; Editor-in-Chief of Journal of Fisheries Society of Taiwan; Associate Editor of Journal of the World Aquaculture Society; Contributing editor of several aquaculture and aquatic biology related journals.
